Monthly Discussion Questions

1. What information was familiar to you?
2. What was new for you or most uncomfortable to take in? How did you react to the new information (i.e. were you surprised, validated, angry, offended, intrigued, shocked, inspired, etc.)?
3. How is what you’ve learned this month affirming or challenging you and your worldview?
4. How have you seen some of the areas of this topic play out in engineering classrooms and workplaces? What do we need to do better, as a team or as a field, to address it?
5. What do you feel are the most important takeaways from this month’s content?
6. Moving forward, what action steps are you taking with you that you learned from this month’s materials and discussion?
