Do you have a hobby such as robotics, computer programming, or 3D printing? Do you enjoy problem solving, learning new technology, or being a leader?

At Ohio State, we can help you turn your interests into a career in manufacturing or consulting. Connect with regional leaders during your very first semester as a Buckeye!

Sample career paths:

- Manufacturing Engineer
- Automation/Controls Engineer
- Project Engineer
- Quality Engineer
- Process Engineer
- Technical Sales Engineer
- Engineering Project Manager

Come and experience the most cost-effective and hands-on engineering degree Ohio State has to offer. The Bachelor of Science in Engineering Technology degree is part of Ohio State’s nationally-ranked College of Engineering and now you can complete all four years at a regional campus!

Ohio is already a leader in manufacturing, with more companies investing in our region each year. This degree was developed with the input of industry leaders from companies such as Honda, Charter Next Generation, and Whirlpool to meet the growing demand for engineers and engineering leaders in Ohio. Opportunities exist to work on projects with local companies through internships and capstone projects.

In addition to 30% lower tuition costs than the Columbus campus, scholarships such as the Choose Ohio First scholarship are also available to offset the cost of this world-class education.
The BSET is a unique program that combines hands-on technology courses in multiple engineering disciplines. Study mechanical and electrical engineering concepts along with the latest Industry 4.0 technologies, such as automation, in a small classroom atmosphere. Combine these engineering skills with leadership and Fisher College of Business principles, and students will be equipped for a wide-variety of careers in engineering and leadership with great earning potential. Be prepared to lead and manage a team if your interests take you there. You will not find this kind of breadth in any other engineering degree at Ohio State or any other institution.
