

Thanks to
you...

...students like Mary Scherer can follow their dreams.

Engineering students have visited nearly 40 countries to perform research, complete service projects and gain an understanding of cultural diversity and its impact on engineering. Gifts like yours not only upgrade classrooms and sponsor student booths at national conferences, they also help students like Mary cover the costs of studying abroad.

Through the humanitarian engineering program, Mary spent a summer in Guatemala introducing a STEM education initiative for preschool children — paying forward the generosity shared by someone like you.
